Find = Count the Digits that Divide a Number

```java
int num = sc.nextInt();  //1234
int tempNum = num;

int lastDig = 0;
int divideCount = 0;

while (true) {

    lastDig = (tempNum % 10);  //4

    if (num % lastDig == 0) {
        divideCount++;
    }

    tempNum = (tempNum / 10);

    if (tempNum == 0) {
        break;
    }

}

return divideCount;
```
